Abstract—This paper presents the design and development of an Artificial Intelligence based poker game. The system incorporates decision-making strategies, probabilistic reasoning, and adaptive learning to play optimally against human or computer opponents.

Index Terms—Poker, AI, Game Theory, Decision Making, Reinforcement Learning

I. INTRODUCTION

Your introduction goes here.

II. RELATED WORK

Discuss research papers and compare.

III. METHODOLOGY

Explain how the system works.

IV. IMPLEMENTATION

Explain dataset/tools/language.

V. RESULTS

Show evaluation, graphs, tables.

VI. CONCLUSION

Write summary + future work.
